

PUE POLYETHER POLYOL & PU PIGMENT PASTES

PUE POLYETHER POLYOL PIGMENT PASTE & POLYURETHANE PIGMENT PASTE

A colorant designed for polyurethane systems, offering excellent compatibility and stable dispersion with PU materials in multiple application scenarios:

PU Adhesives: Does not interfere with adhesive viscosity, curing speed or bond strength (e.g., identification coloring of sealants and structural adhesives).

Chemical-Resistant Flooring: Stable coloring without affecting floor abrasion resistance or weatherability.

PU Foam / Memory Foam: Uniform coloring during foaming without obstructing cell structure formation; suitable for foam products in furniture and medical applications.

Artificial Turf Elastomer Base: Provides black coloration for the turf backing elastomer; UV and weathering resistant, bonds firmly to the substrate with excellent color retention.

PU Pultrusion: Compatible with pultrusion processes, ensuring stable dispersion in continuous production without compromising material flow.
